

Enrolment is now open for the revalidation of OCQ(V)s AX, EQ, GX, PX and UX

Dear Colleague,

Further to APHA briefing note 10/18 - Revalidation of OCQ(V) export related modules published on the 4th May:

The enrolment for the revalidation of the following OCQ(V) qualifications has now re-opened: Avian Exports (AX), Equine Exports (EQ), Germinal Product Exports (GX), Product Exports (PX) and Ungulate Exports (UX). **If you were previously due to revalidate by March 31st 2018, you must now enrol by July 31st 2018.**

Please log in to your OV training dashboard at <https://www.improve-ov.com/home/> to enrol for the course or courses that you wish to revalidate.

If you had previously enrolled but had not completed your revalidation training, you will be able to continue from where you left the course. To do this please enrol and pay for the course (this fee was refunded when the revalidations were halted in February). Completing your enrolment will renew your access to the course. This enrolment must be completed by midnight on July 31st 2018.

If you had previously passed and completed your revalidation training please re-enrol and pay for the course, (this fee was refunded when the revalidations were halted in February). This will automatically re activate your revalidation and update the renewal date to 31st July 2021. This re enrolment must be completed by midnight on 31st July 2018.

APHA have agreed that all grandfather rights OVs who have enrolled on a revalidation course (previously due by 31st March 2018) **by midnight on the 31st July 2018**, will have until **midnight on the 30th August 2018** to complete their revalidation.

Kind Regards,

Improve International
